

SCORPIO

(OCTOBER 23 – NOVEMBER 21)

Traits and Characteristics

Scorpio is a sign of the water element. It is the second sign of the water triangle (Cancer, Scorpio, and Pisces), but its ruling planet is Mars, which is a fire planet. The combination of water and fire helps to convert water into vapors, which are one of the main sources of energy. In Scorpio, there is a limitless repository of this energy, so they are always engaged in their work; and once they are determined to do such work, they don't sit quietly until it's finished.

To take advantage of their energy, they should be made to realize their supremacy. There is a great difference between a Scorpio and a Taurus, which sign is also ruled by Mars. The difference is that Taurus thinks of themselves as born leaders and find it difficult to work under anybody. They lack stability while away or misuse their energy. On the contrary, Scorpio is more inclined to creative activity.

Scorpio is an equal or a female sign, and such signs are considered wild and polite, and they do not get into conflict with others unless they are forced to do so. But, once somebody irritates or excites them, they do whatever they can to insult such person. In these situations, female Scorpios are like an injured lioness.

Mars gives Scorpio qualities like self-confidence, courage, determination, and fearlessness. If they like somebody, they like them from the depths of their heart, and if they dislike somebody they do so from their heart as well. They fight for themselves and choose their own path. The greatest quality of Scorpios is that they are always under the control of their emotions, not only in love affairs, but in all other work. If they do not get an opportunity to stay on the highest emotional position, they fall prey to psychological diseases. If they apply their energy to fight against injustice, they can possess extraordinary intuitive power.
