# Foreword

Command is the thing derived from reality and might. Reality without might achieves nothing. Might without reality renders wasted action. The idea of taking command teaches you to purposefully blend knowledge and actions to develop levelheaded results.

When you live without command, your default demeanor is to waste your time. You might gain some knowledge, but you won't apply it very well. You've the potential to live a mighty, self-directed life of your choosing, but till you take command, this potential stays an illusion.

With taking command, you not only accept responsibility for your life story, you take total charge of it. You'll have the clarity to distinguish the sort of life story you wish to live, as well as the might to really produce it.

***Law Of Attraction: Taking Command***

***Develop True Effectiveness In Every Area Of Your Life.***

---

# **Chapter 1:**

## *Authority*

---

# Synopsis

*There's only a single real authority in your life, and it's you. You make the choices. You conduct the actions. If you're looking for some external authority figure, leader, or guru to tell you how to live your life story, you're searching in the wrong place. That person is you. Whether you feel prepared or not, you're in charge.*

## **Be Ready**

In spite of what you might have been disciplined to believe, there's no greater authority in this life than you—not your parents, your foreman, or your preferred God. If you believe anybody else has power over you, it's only because you give in your authority on purpose.

Occasionally the results of not doing so are so grave that you might feel as though you've no choice, but really you always do. Even if threatened with harm or demise, you stay the commanding officer of your own life. A few of your selections might be exceedingly limited, but they're forever yours to arrive at.

True authority doesn't mean the unchecked exercise of power. A levelheaded commander doesn't bark random orders and require them to be blindly obeyed. Authority must be rooted in reality and based on a precise assessment of the state of affairs.

You're the one who comprehends your reality, and you have to choose how to behave (or not behave) based upon your perceptions. How you handle that data is up to you, and life expects your orders. You might feel well groomed, or you may feel unready, but the weight of command is yours regardless what.

Allow me to me clarify that there's utterly nothing incorrect with living in a way that you believe honors your Almighty Creator, but this option has to be made freely and consciously. No honor is encountered in blind obedience.

For greater or worse, you've been allowed free will, so you have to forever bear the weight of decision. If you fall prey to the notion that some dictatorial God may punish you for practicing your free will, realize that such a notion can't possibly serve you, and settle to let it go.

It makes no sense for somebody to present you a gift and then penalize you for opening it. Find out how to arrive at your own witting choices, independent of what you believe the higher power or anybody else expects from you.

If you weren't prepared for your own authority, you'd never have been given free will. If you neglect to take authority over your own life story, somebody else will certainly take it for you.

A lot of individuals let their mate, parents, or boss virtually run their lives. This exercise draws you out of alignment with reality and might and drops you into an inferior state of awareness. You get more and more helpless as you distance yourself from your real nature. You're intended to be free.

Look around you and expose the results you're presently getting. Life is merely obeying your instructions. If you wish different outcomes, you have to supply different orders. You're the sole one certified to arrive at these choices. No one else may fill the role of commander of your life story but you.

---

# **Chapter 2:**

*Effectiveness*

---

# Synopsis

*As command is anchored in reality, this is immensely practical.*

*Effectiveness is the real measure of command. Good decisions must be backed up by levelheaded action to yield true results.*

*In order to take command, you have to consider 2 questions:  
Am I arriving at the right decisions? Am I engaging in the right actions?*

## **Good Lessons**

As you carry out your authority decisions, you must return once more to the idea of information. Notice the results you're getting. Are they uniform with your anticipations? Learn from your success as well as your errors. Your brain will gradually better its anticipatory accuracy when you confront like situations in the future. Experience is the finest teacher of effectiveness.

Observe how elegantly reality and might work together to better your personal effectiveness over time. First, you distinguish one of your wants and make a determination to move towards it.

Then you utilize your anticipatory powers to choose a sensible course of action. As you advance towards your goal, you have only to distinguish the following action you anticipate will move you in the right direction. You utilize your might to move yourself ahead, one step at a time. As you take these little steps, your anticipatory mind is forever looking ahead, continually refining its choices and assessing the outcomes of the choices you've already applied.

Perhaps you achieve your goal; perhaps you don't. Either way, you get a powerful gain. When you succeed, your successful anticipations, choices, and behaviors are rewarded. When you bomb, your brain learns that its predictions were erroneous, and it updates your example of reality to help prevent you from duplicating the same errors.

Try to recognize that failure is your friend. While it's frequently dissatisfactory to miss the goal you aspired to, there's always another

prize. When you bomb, you get brighter. You teach your brain to get better at anticipation. This is a vastly powerful result.

You can't anticipate being competent when you take on something new, but you can anticipate that you'll improve over time. Either you'll succeed, or you'll learn from it. If you bomb often, it simply means you've more to learn before you're prepared to succeed.

---

# **Chapter 3:**

*Doggedness*

---

# Synopsis

*To get competent in any fresh effort, you might need to invest a substantial amount of time, frequently many years. It's imperative that you provide yourself sufficient time to establish your effectiveness. Your brain has to gain adequate experience to arrive at accurate predictions.*

## **Stick With It**

If you give up too early, you'll never finish the shift from beginner to authority, and the authority level is where most of the payoffs are found.

If you hear somebody say that success is simple, break away as fast as you can as you're about to hear a sales talk for a different get-rich-quick scam. The honest reality is that it's really hard —almost impossible—to win at something you've never done previously. But that's perfectly all right. Comprehend that failure and success aren't opposites. If you fail, it signifies you're taking action, so you're making errors and training yourself. Success occurs naturally once you ultimately learn how to take the right actions.

Be patient with yourself as you go through failure. When you're questing after a goal you truly want, the sort that virtually brings you to tears when you consider it as you connect with it so profoundly, then you have to stay with it. Regardless how difficult it gets, don't quit.

Don't press yourself to accomplish massive success at the beginning. Simply do the best you are able to. Initially, your best might be scarcely one notch above total cretin—if you're lucky. Sooner or later you'll earn some basic competence. And farther down the road, individuals will call you an authority—an authority being an individual whose failed enough to win.

It's unbelievably inspiring to watch individuals battle through one failure after another without resigning. From the exterior looking in, it might appear as if they can't possibly succeed. But they still hang in.

Finally they learn what they have to learn. They successfully adjust their anticipations to fit reality, and ultimately their actions start bringing on the intended results. I'm struck by those who I can see are bound for greatness, but no one else recognizes it yet. The revealing sign is always the same—doggedness.

If you're clear about what you wish, reconcile for nothing less. Admit that success will take time, maybe much longer than you'd like. Free yourself of the quick and simple, something-for-nothing mentality.

Keep your head down, work hard, and understand that your work will eventually pay off, as long as you continue learning and developing.

---

# **Chapter 4:**

*Self-assurance*

---

# Synopsis

*As you arise into taking command, you'll gradually acquire self-assurance. I'm not referring to the "Fake it till you make it" face that demands you to pump yourself up, like you may do before asking somebody on a date or getting up to talk before an audience. I'm talking about a mightier, more profoundly held belief in your capabilities, a notion forged by experience and solidly rooted in reality.*

## **Confidence**

This sort of confidence can't be counterfeited. True self-assurance isn't brassy, cocky, aggressive, or self-important. It isn't a belief of dominance or superiority over other people. Nor is it fake modesty, self-effacement, or submissiveness. Once you see your might through Reality, you get naturally confident.

It isn't simple to acknowledge the reality of our might. Too frequently we dread our own greatness. We make-believe we're powerless, mistakenly believing that this in some way frees us from the responsibility of might.

It's truthful that we may deny ourselves access to our own power, but we may never escape total obligation for our lives. If we live in denial of this reality, we block ourselves from true self-assurance and settle for temporary brassiness at best.

Self-assurance starts with a resolute commitment to reality. You can't get genuinely confident by making believe your way into it. To build up your self-assurance, strive to become as truthful as possible, both with yourself and other people.

The more truthful you become, the more accurate your example of reality will be. As you see reality with increasing accuracy, your choices will improve, and in turn so will your actions and your results.

Accurate notions lead to effective outcomes, and self-assurance is the emotional remainder of effectiveness. You feel confident when you are able to anticipate favorable results from your actions with an elevated degree of certainty.

Self-assurance has both short-run and long-run forms. Short-run self-assurance is the anticipation of short-run success. For instance, you might feel confident about driving your auto now as you've driven it so many times previously, so it's fair to anticipate continued success in that area.

Long-run self-assurance is the anticipation of long-run success, even though short-run failures might happen. This type of self-assurance comes from realizing that failure is a crucial part of accomplishing goals. While you might not expect to succeed in a fresh endeavor immediately, you feel confident you'll finally succeed if you hang in.

Don't bother attempting to fake self-assurance. It's not genuine and totally unneeded. There's no need to wangle yourself into a mistaken feeling of certainty when actually you're filled up with self-doubt. It's absolutely all right to feel tentative and still take action.

If you merely endure, your doubt will finally fade as you build up experience, and you'll realize the feeling of real self-assurance rather than having to perpetually fake it. If you attempt something new and truly stink at it, merely accept how bad you are without attempting to profess otherwise, and understand that you'll finally grow beyond this stage. There's utterly no disgrace in being an initiate. Beginning is merely the opening move toward winning.

---

# **Chapter 5:**

*Meaning*

---

# Synopsis

*Individuals who exercise command center on what truly matters to them. They don't blow time and energy on trivialities.*

## Importance

People who take command realize the truth that mightiness may be applied to non-meaningful pursuits, or it may be channeled towards substantial accomplishments. Such individuals consciously pick the latter instance; some of the times for the mere reason that it's the course that brings about the most development.

What's crucial to you in life? What's a relative non-purposeful waste of your time? While these are choices you are empowered to arrive at freely, the reality aspect of command reminds you that you can't elude the results of your actions. In order to remain lined up with both reality and might, you have to cautiously think about those results. Once you pick out a course of action, you likewise pick out the consequences.

Your power to anticipate the impact of your actions of course won't be perfect, but you are able to still make sensible conclusions as to whether you're wasting away your time or putting it to great use. Which activities are for the most part purposeless? Which ones will have a true affect on you and your surroundings? You are able to certainly come up with halfway -adequate answers without requiring a fortune teller.

# Wrapping Up

Taking command teaches you to make here and now choices that you anticipate will have positive long-run results. There are no indifferent actions. If you can't frankly anticipate a positive long-run affect from

your actions, accept that you're blowing your time, and set a few goals that truly matter to you.

There's no replacement for committing to something in your life that has the likely chance to make a true difference.

Who sets what's important and what isn't? You're the expert here, so that conclusion is yours to make. Tune in to your feelings.

Do you feel that you're contributing to a significant purpose?

Or do you feel empty inside, fretting that your potential is being squandered?

What's the reality of your situation?

Can you sense the difference between the crucial and the irrelevant?
